

Proposed SUTA Trail System Map – March 2010

The Jack-Ash Trail is a “general” idea of the route for the proposed SUTA trail system and is very preliminary in nature. The combination of needing BLM approvals and private landowner involvement may mean this route changes substantially over time. SUTA will post revised maps as the route becomes developed. The trail system may also be expanded as short loops are added in key areas to enhance trail use and access or local residents come up with expansions for trails already in existence on either public or private lands.
